

Title:	<b>Learning to ride 6.0</b> Basic skills final rider assessment
Objectives:	Indicate, via this assesement, to all observers, that the rider has passed the Familiarisation skills levels and is considered capable of progressing to 'big track' riding,
Goals:	Facilitate the movement of appropriately skilled riders through to 'big track' and racing environments to continue their development
Subject:	Final rider assesement – basic skills
Procedures	Observation, discussion, assessment, sign off or continue further instruction
Technique	Visual observation of rider by lead trainer or training coordinator of riders practical skills. Discussion between club committee and/or riders support team, and the lead trainer or training coordinator. Yes/No assesement.
Most Common Mistakes	Overestimating the skills level achieved by the rider Overlooking certain key skills for development at 'some future time'.
Summary	<p>This is the final assessment of the junior rider and the level of their motorcycle riding skills before they are to be facilitated through to 'big track' riding and/or into junior class racing.</p> <p>This is an important step for the rider as without the appropriate skills they may pose a danger to themselves and to others. But also, at the racetrack they may not derive the maximum enjoyment from the sport that they desire or deserve.</p> <p>It may or may not be undertaken as an examination type activity, or more simply, by the trainer/coordinator during training sessions of the rider who is known to have already undertaken a course of training and practice.</p> <p>Assessment will be undertaken by approved trainer/junior coordinator and/or appropriate club officials. Assessment may be done with rider present so that questions can be asked of and answered by the rider.</p>
